Multiplication and Division
Let's Revisit

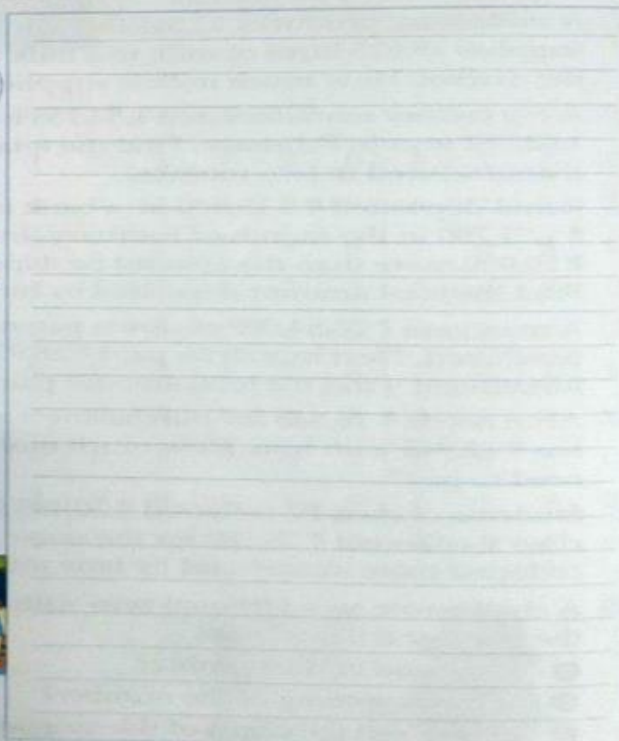

1. Rahul visited an amusement park with his friends. He observed that seating capacity was written there on each ride. As they were enjoying some problems arose. Try to answer them:

Such a big queue in roller coaster! If 84 people are standing in the queue can you tell me the number of rounds it will take?

I want to buy 10 ice creams for my friends and the cost of one ice cream is ₹ 25. How much do I have to pay?

If ferris wheels takes 134 rounds in a day in its full capacity, I wonder how many people must have taken ride in it in a day.

We got 175 coupons for the gaming counter. We are five friends. How many coupons each one of us will get?

Sub: - Science

1-When you have a cold and cough , your parents ask you not to go to school why?

2- Vijay always has snacks like potato chips ,noodles and burger .Mohan spend his holidays sitting in front of computer. He does not play any outdoor games or do any other form of exercise what trouble could both of them be asking for?

Sub: - Computer

- Make a PPT on Calculating devices and its history. Inserts Images and clipart into the presentation to make it attractive and also change the theme and design of your slides.
