

DISASTER MANAGEMENT COMMITTEE

SESSION: 2022-2023

The primary aim of the Disaster Management Committee is to review the threats related to disaster, evaluating the preparedness and considering suggestion for the improvement of the Disaster Management plan. The responsibility of the committee is to make necessary arrangement of emergency action and for providing immediate rescue and rehabilitation to the deceased.

The objectives of the plan are:

- To identify the hazard in and around the school and find ways to manage these hazards.
- To plan and implement risk reduction and risk reduction activities in the school.
- To have effective disaster preparedness, and effective emergency response for saving of lives.
- To help identify training and capacity strengthening needs for effective prevention, mitigation and response for disasters.
- To undertake information, education and communication activities to create awareness among communities and the general public, including of the School Disaster Management Plan.

04	VAISHNAVI JAISWAL	STUDENT REPRESENTATIVE (CLASS IX)	NA
05	ASHUTOSH KUMAR	STUDENT REPRESENTATIVE (CLASS IX)	NA

Meeting 1: 03-08-2022

Minutes of meeting:

1. It is equally important to recognize that planning for safety at the school level is not a one time or static process; it is an 'on-going' dynamic process involving identification of safety needs, developing prevention, response and preparedness protocols, evaluating physical facilities, and providing communication and training for staff members and students.
2. Knowledge building plan including awareness creation, mass sensitization, mock-drills including follow up through regular school timetable. This would also include the use and regular maintenance of emergency equipment such as fire extinguishers.
