MONTHS	COURSEBOOK	SYLLABUS	ACTIVITY (lab/individual/role play) + NCERT book activities
APRIL (2023-2024)	1. Nutrition in plants		1.cover a part of the leaf with black paper, compare the color with the uncovered part, and test with iodine solution. + worksheets
MAY (2023-2024)	2. Nutrition in animals		<ol style="list-style-type: none"> Digestive System Role Play: Divide the students into small groups and ask them to act out the process of digestion in the human body. Assign each student a specific organ or part of the digestive system, and have them describe the functions of each part as food moves through the body. Food Testing: Bring in a variety of food samples and ask the students to test them for the presence of different nutrients such as starch, proteins, and fats. They can use simple chemical tests to identify these nutrients, such as the iodine test for starch.
JUNE (2023-2024)	3. Heat	PT 1 SYLLABUS- 1,2,3	<ol style="list-style-type: none"> Temperature Investigation: Ask the students to investigate how temperature changes affect different materials, such as metal, plastic, and wood. They can use a thermometer to measure the temperature of each material as it is heated or cooled, and record their observations in a table or chart.

			<ol style="list-style-type: none"> Heat Transfer Demonstration: Set up a demonstration to show the different ways heat can be transferred, such as conduction, convection, and radiation. For example, you could place a metal spoon in hot water to show how heat is transferred through conduction, or use a lamp to demonstrate radiation.
JULY (2023-2024)	<ol style="list-style-type: none"> Acids bases and salts Physical and chemical changes 		<ol style="list-style-type: none"> pH Testing: Provide students with a pH testing kit or litmus paper and ask them to test different household substances to determine whether they are acidic, basic, or neutral. They can create a chart or table to record their findings and discuss the properties of each substance. Neutralization Reaction: Demonstrate a neutralization reaction by mixing an acid and a base together and measuring the pH of the resulting solution. This can be done using household substances like vinegar and baking soda, or using chemicals in a lab setting. Discuss how neutralization reactions occur and their real-world applications. Observing Physical Changes: Ask students to observe and describe the physical changes that occur when different materials are manipulated or combined. For example, they can describe what happens when they tear a piece of paper, crumple aluminum foil, or mix salt and water. Investigating Chemical Changes: Provide students with a set of materials and ask them to perform a series of experiments to determine which combinations result in a chemical change. For example, they can mix baking soda and vinegar to observe the production of carbon dioxide gas or mix iron filings and sulfur to observe the formation of iron sulfide.
AUGUST (2023-2024)	<ol style="list-style-type: none"> Respiration in organism 		<ol style="list-style-type: none"> Breathing Exercises: Demonstrate different breathing exercises, such as deep breathing or pranayama, and discuss how these exercises can improve lung capacity and overall health. Students can practice different breathing exercises and measure their own respiration rates before and after the exercises.
SEPTEMBER (2023-2024)	Revision And Half Yearly Exams	HALF YEARLY/PT-2 SYLLABUS- 1,2,3,4,5,6	
OCTOBER (2023-2024)	<ol style="list-style-type: none"> Transportation in animals and plants 		<ol style="list-style-type: none"> Observing Transpiration: Demonstrate how water moves through plants by observing the process of transpiration. Students can place a clear plastic bag over a leafy plant and observe the water droplets that form inside the bag over time.
NOVEMBER (2023-2024)	<ol style="list-style-type: none"> Reproduction in plants Motion and time 	PT-3 SYLLABUS-7,8,9	<ol style="list-style-type: none"> Flower Dissection: Dissect a flower to identify its different parts, including the petals, stamens, pistil, and ovary. Students can discuss the role of each part in the reproduction process and the different methods of pollination.

DECEMBER (2023-2024)	10. Electric current and its effects		1. Making a Circuit: Demonstrate how to make a simple electric circuit using a battery, wires, and a bulb. Students can practice making circuits and observe the effects of different components on the circuit's performance.
